

ARUN KUMAR RANA

.NET Full Stack Developer | C# | ASP.NET Core 8 | Web API | SQL Server | Azure

Gurugram, Haryana, India | +91 6204010212 | arunkrana5@gmail.com | linkedin.com/in/ranaarun/

PROFESSIONAL SUMMARY

Results-driven .NET Full Stack Developer with 3.5+ years of experience designing, building, and deploying secure enterprise web applications, RESTful APIs, ERP systems, HRMS portals, and financial engines. Specialized in C#, ASP.NET Core 8, Web API, Entity Framework Core, SQL Server, and Azure Cloud. Combines a strong background in business & financial logic (B.Com, M.Com) with advanced software engineering (MCA). Proven track record of optimizing database query performance by 35%, automating reporting workflows to save 15+ hours weekly, and implementing secure JWT & RBAC authentication schemas.

TECHNICAL SKILLS

- Languages & Core:** C#, SQL, LINQ, JavaScript (ES6+), HTML5, CSS3
- Backend & Web APIs:** ASP.NET Core, ASP.NET MVC, RESTful Web APIs, EF Core, Dapper ORM, ADO.NET, Microservices Architecture
- Cloud & DevOps:** Microsoft Azure (App Services, SQL Database, Blob Storage), Docker (Basics), Git, CI/CD Pipelines, IIS Server
- Databases & Caching:** SQL Server, Stored Procedures, Index Tuning, SQL Agent Jobs, Execution Plan Optimization, Redis Caching
- Frontend & UI:** Blazor (Server & WebAssembly), React.js (Basics), jQuery, Bootstrap 5, CSS Flexbox/Grid
- Architecture & Testing:** Clean Architecture, SOLID Principles, Repository Pattern, Dependency Injection, Unit Testing (xUnit / Moq), Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer | Thrivera Staffing Services Pvt Ltd

Gurugram, Haryana | July 2024 – Present

- ERP & HRMS Engineering:** Spearheaded end-to-end development of enterprise modules for Attendance, Payroll, Sales Tracking, and Approval Workflows, resulting in a 25% increase in business process speed.
- Clean Architecture & Web APIs:** Structured scalable RESTful APIs in ASP.NET Core 8 following Clean Architecture, Repository Pattern, and Dependency Injection. Secured endpoints using JWT authentication and Role-Based Access Control (RBAC).
- Database Query Tuning:** Rewrote legacy stored procedures, added non-clustered indexes on key transaction tables, and resolved execution plan bottlenecks, achieving a 35% reduction in SQL query latencies.
- Process Automation:** Engineered automated reporting and notification pipelines via SQL Agent Jobs and background tasks, saving HR and operations teams 10+ hours per week.
- UI Modernization (Blazor):** Migrated legacy views to Blazor WebAssembly using component reusability and CSS Flexbox/Grid, cutting client-side interface load times by 30%.
- Unit Testing & QA:** Authored comprehensive unit test suites using xUnit and Moq, achieving 80% code coverage and reducing production defect occurrences by 20%.

Software Developer | Sapphire Technocrats Pvt Ltd

Noida, Uttar Pradesh | Sept 2022 – July 2024

- Enterprise MVC Applications:** Designed and maintained core business modules using ASP.NET MVC and SQL Server, supporting workflow execution for 5,000+ active daily users.
- High-Performance Data Access:** Utilized Dapper ORM and ADO.NET connection pooling for low-latency batch data operations and high-throughput transactional queries.

- **Security & Access Control:** Engineered custom Role-Based Access Control (RBAC) schemas, managing granular system permissions across employee, manager, and administrator tiers.
- **Asynchronous UI Enhancements:** Re-engineered synchronous page lifecycles to utilize jQuery AJAX endpoints, reducing overall page-load latency by 20%.
- **Production Support & Deployment:** Diagnosed server event logs and database lock issues, stabilized local/production IIS deployments, and maintained a 99.5% application uptime SLA.
- **Agile Operations:** Actively participated in Scrum ceremonies (sprint planning, daily standups, code reviews), delivering sprint deliverables ahead of deadlines.

KEY PROJECTS

ERP & HRMS Platform

Tech Stack: ASP.NET Core 8, Blazor (WebAssembly/Server), SQL Server, EF Core, LINQ, JWT

- Structured the backend using Clean Architecture guidelines and Repository patterns to decouple database dependencies from business rules.
- Engineered core modules for Attendance Tracking, Leave Workflows, and Employee Onboarding, managing complex state transitions and hierarchical approval levels.
- Configured DbContext pooling, optimized EF Core queries, and executed database migrations to guarantee low-latency data access and zero-downtime deployments.

Automated Ticket Management System

Tech Stack: C#, ASP.NET MVC, SQL Server, Dapper, JavaScript, jQuery, Bootstrap

- Designed and coded a multi-level ticketing, timesheet, and leave management system, mapping automated escalations and alerts.
- Created a customizable Role-Based Access Control (RBAC) engine that manages granular permissions for Employees, Managers, HR, and System Administrators.
- Engineered a custom task queue and notification engine to automate report compilations, reducing ticket resolution timelines by 18%.

Vendor Management & Financial Portal

Tech Stack: ASP.NET Core, Web API, SQL Server, Dapper, JavaScript, HTML5, Bootstrap

- Developed secure vendor registration, compliance vetting, and onboarding workflow modules with multi-step validation checks and document uploads.
- Built invoice submission, balance confirmation, and payment tracking modules using database-level SQL transactions.
- Programmed multi-threaded export modules allowing administrators to fetch and download financial reports containing 10,000+ rows to Excel in under 2 seconds.

Payroll Calculation Engine

Tech Stack: ASP.NET Core, SQL Server, Stored Procedures, JavaScript, HTML5, Bootstrap

- Coded mathematical payroll engines evaluating complex salary structures, allowance configurations, tax deductions, and compliance regulations.
- Handled heavy math operations directly inside SQL Server stored procedures and User-Defined Functions (UDFs) to maximize processing speed for large employee batches.
- Automated payslip generation and email distribution processes, reducing overall monthly payroll processing cycles from 3 days to under 2 hours.

EDUCATION

Master of Computer Applications (MCA)

Chandigarh University, Mohali, Punjab | 2022 – 2024

Master of Commerce (M.Com)

Vinoba Bhawe University, Hazaribag, Jharkhand | 2020 – 2022

Bachelor of Commerce (B.Com)

Markham College of Commerce, Hazaribag, Jharkhand | 2015 – 2018
